
"Read Full Article" in intro text

Posted by zev - 2008/03/23 05:02

Hi. I just installed this and I think its super cool. Just one question: Any way to display the link to the original article in the intro text, instead of making users click to read more?

Thanks.
Zev

For now there is no way to do that, I'll add a feature to do it soon.

Best regards,
Mario - Feed2post coder

Well, any way I can tweak the code simply to do it?
Zev

Sorry for the delay.
Yes there is a way to tweak the code, but it's version dependant, so please tell me your version and I'll tell you how or I'll make you a patch for that you need...

Best regards,
Mario

The latest one. 1.33.
Thanks.
Zev

Re:"Read Full Article" in intro text

OK, then change the following code:
Line numbers are on left side

```
331: $row->fulltext .= (getUseLinkBack()=="1") ? $linkback:"";
```

change it for:

331: \$row->introtxt .= (getUseLinkBack()=="1") ? \$linkback:"";

Be sure to make a backup before doing any mod.

Best regards,
Mario
