
Position of read more link

Posted by schelly - 2008/07/30 12:36

I promise -- this is my last request. Well, for today anyway. :)

We would love to be able to tell Feed2Post how to position the read more link. Sometimes I don't want "read more" to be on its own line. Sometimes I want "read more" to appear right after the last word of the last sentence, with only a couple of spaces in between.

Can you make an option "use the following code instead of a new line before the Read More link:" where I can just put in a few ; spaces?

Thanks!

:silly:
