
or option

Posted by mikees - 2008/07/21 08:13

the version 2.5 work very well and thank you Mario for the add of some of my request(target blank).

I've another request.

In some Feed, the pictures are not in but in or or .

It could be a great option to choose to add this picture link in the article(before or after the text).

And maybe with picture linked to the article page...

Feed exemple(+18 link): <http://www.freeviewmovies.com/rss.xml>

Re:or option

we'll consider this extension for a future release, it's not too hard to do, but we'll evaluate the real utility of this.

Best regards,
Mario
